01 Who You're Meeting

David Bratt — Chief Financial Officer, Sand Technologies.

In role: Chief Financial Officer at Sand Technologies

Today: Drives financial strategy and the funding structure enabling Sand to scale in the AI industry.

A private-equity and M&A finance operator — which makes him the most natural counterpart at Sand for a private-markets investor. He brings nearly twenty years of experience across M&A, private equity and operational finance, helping high-growth organisations expand globally. Most recently he helped scale Exiger, a supply chain AI and SaaS business, into a multi-billion-dollar enterprise, where he played a leading role in acquisitions, financial strategy and operational scaling.

Career: Chief Financial Officer, Sand Technologies; Finance leadership — acquisitions, financial strategy, operational scaling, Exiger (supply chain AI/SaaS); M&A, private equity and operational finance roles, High-growth technology organisations

The company: Private Physical AI vendor with deep emerging-market delivery reach via its ALX talent pipeline; deployed in 18+ countries with a services-heavy, project-based model rather than disclosed SaaS metrics.

What they sell: Symmetri — a real-time “Physical AI” control layer (Sense / Analyze / Act) that models physical assets and networks and can act on them directly, for water, energy, telecom, health and government operators.

02 Where The Company Sits

The category creator framing — “Physical AI” as sensing, modeling and directly acting on infrastructure. Smallest and least capitalized name on this list; its edge is emerging-market reach, not platform scale.

03 Talking Points

- Ex-private equity — speak to him in PE terms about value creation and he will engage on that basis.
- Sand is private and does not publish financials. He is the person who can answer vendor-viability questions directly.
- Exiger experience means he has scaled an AI/SaaS business commercially, not just financed one.

What to pressure-test about the company:

- Headcount down ~6% (6-mo) / ~9% (2-yr) per Simplify tracking, despite a growth narrative
- Revenue concentration in large infrastructure clients, which creates project-delay risk if deployments slip
- Analyst-rated C on Differentiation — crowded field vs. Palantir, C3.ai, Cognite, Bentley, AVEVA

04 GIP Context

GIP: No direct connection found. Sand is privately held with no disclosed GIP investment, and none of Sand's named customers appear on GIP's own portfolio-company list (airports, ports, rail, data centers, water/waste and energy assets).

BlackRock: No equity or ownership connection found. There is a real indirect link worth flagging, though: Sand's flagship water-utilities case study customer, Thames Water, has BlackRock as one of the senior creditor bondholders (alongside Aberdeen...

Others at Sand Technologies: Fred Swaniker (Founder & CEO); Danai Mavunga (Chief Operating Officer); George Ionita (Chief Technology Officer)
