01 Who You're Meeting

Cedrik Neike — Managing Board Member & CEO, Digital Industries, Siemens Xcelerator.

In role: Managing Board member since April 2017; CEO of Digital Industries since October 2020

Today: Runs Digital Industries — the automation and industrial software business where Siemens Xcelerator lives — along with Siemens Advanta, IT and cybersecurity.

An unusual career arc: he began with vocational training in business administration at Siemens, left for nearly a decade at Cisco, and returned to the Managing Board. At Cisco in Germany from 2008 to 2017 he was Senior Vice President for Global Service Provider sales across EMEA, Russia and Asia-Pacific, and SVP for worldwide service delivery, spending a significant period in Silicon Valley. He rejoined Siemens on the Managing Board in April 2017, led Smart Infrastructure as CEO from April 2019, and moved to Digital Industries in October 2020.

Career: Chief Executive Officer, Digital Industries, Siemens AG; Chief Executive Officer, Smart Infrastructure, Siemens AG; Member of the Managing Board, Siemens AG; SVP Global Service Provider sales (EMEA, Russia, Asia-Pacific); SVP worldwide service delivery, Cisco Systems

Education: MBA, INSEAD; BEng (Honours) Engineering with Business Finance, University College London and London School of Economics

The company: The broadest ecosystem on this list by design — an open marketplace of Siemens and third-party tools rather than a single unified product, backed by one of the largest industrial conglomerates in the world.

What they sell: A marketplace/ecosystem spanning Teamcenter, NX, Solid Edge and Simcenter (engineering software), Building X and Industrial Operations X (IoT/AI operations), plus a growing library of partner apps and an Industrial Copilot.

02 Where The Company Sits

Overlaps with Sand on digital twins and cross-sector ambition, but Xcelerator is a marketplace/ecosystem strategy rather than a single deployed control-layer product.

03 Talking Points

- Digital Industries is where Xcelerator actually sits. For anything about the platform rather than the group, he is the counterpart.
- He owns cybersecurity and IT at board level too, which matters if operational-technology security is part of the conversation.
- Cisco background means he understands selling infrastructure to operators, not just building it — a commercially fluent conversation.

What to pressure-test about the company:

- Xcelerator-specific revenue is never broken out from Siemens AG's overall digital business figures
- Marketplace/ecosystem complexity means buyers assemble multiple products rather than adopt one unified platform
- Platform-wide metrics (40% ramp-up reduction, etc.) are aggregate marketing figures, not single-customer audited results

04 GIP Context

GIP: No named GIP portfolio company was confirmed as a Siemens customer, though Siemens' scale across rail, energy and industrial automation plausibly overlaps with several GIP-owned assets (e.g., Pacific National and Italo rail, various energy platforms) — no specific deployment was confirmed.

BlackRock: Confirmed — BlackRock is Siemens AG's largest shareholder at roughly 6.5%–6.9% of shares outstanding across recent disclosures, ahead of Vanguard and Capital Research and Management.

Others at Siemens Xcelerator: Roland Busch (President & CEO, Siemens AG)
