01 Who You're Meeting

Roland Busch — President & CEO, Siemens AG, Siemens Xcelerator.

In role: President and CEO since 4 February 2021, succeeding Joe Kaeser

Today: Leads Siemens AG across Digital Industries, Smart Infrastructure and Mobility, with Siemens Xcelerator as the open digital business platform tying them together.

A physicist who has spent his entire career at Siemens, and whose own operating history runs directly through transport and infrastructure — which makes him unusually well matched to an infrastructure portfolio. He joined in 1994 as a project manager in central R&D at Erlangen, then led Corporate Strategies, the Mass Transit Division and Infotainment Solutions, and was President and CEO of Siemens VDO Automotive Asia Pacific in Shanghai.

Career: President & Chief Executive Officer, Siemens AG; Deputy CEO and Labor Director, Siemens AG; Chief Technology Officer (also COO and Chief Sustainability Officer), Siemens AG; Member of the Managing Board, Siemens AG

Education: Dr. rer. nat. (physics), Friedrich-Alexander University Erlangen-Nuremberg; Dipl.-Phys., Friedrich-Alexander University Erlangen-Nuremberg and University of Grenoble

The company: The broadest ecosystem on this list by design — an open marketplace of Siemens and third-party tools rather than a single unified product, backed by one of the largest industrial conglomerates in the world.

What they sell: A marketplace/ecosystem spanning Teamcenter, NX, Solid Edge and Simcenter (engineering software), Building X and Industrial Operations X (IoT/AI operations), plus a growing library of partner apps and an Industrial Copilot.

02 Where The Company Sits

Overlaps with Sand on digital twins and cross-sector ambition, but Xcelerator is a marketplace/ecosystem strategy rather than a single deployed control-layer product.

03 Talking Points

- A physicist who ran mass transit — the single best-matched background in this contact list to transportation and energy assets.
- Siemens spans software, hardware and the physical systems underneath. Test whether Xcelerator actually connects them or simply brands them.
- He chairs Siemens Mobility separately from the group CEO role, so rail-specific conversations can go straight to him.

What to pressure-test about the company:

- Xcelerator-specific revenue is never broken out from Siemens AG's overall digital business figures
- Marketplace/ecosystem complexity means buyers assemble multiple products rather than adopt one unified platform
- Platform-wide metrics (40% ramp-up reduction, etc.) are aggregate marketing figures, not single-customer audited results

04 GIP Context

GIP: No named GIP portfolio company was confirmed as a Siemens customer, though Siemens' scale across rail, energy and industrial automation plausibly overlaps with several GIP-owned assets (e.g., Pacific National and Italo rail, various energy platforms) — no specific deployment was confirmed.

BlackRock: Confirmed — BlackRock is Siemens AG's largest shareholder at roughly 6.5%–6.9% of shares outstanding across recent disclosures, ahead of Vanguard and Capital Research and Management.

Others at Siemens Xcelerator: Cedrik Neike (Managing Board Member & CEO, Digital Industries)
