01 Who You're Meeting

K Krithivasan — Chief Executive Officer & Managing Director, Tata Consultancy Services.

The company: The largest Indian IT services firm and, on the evidence here, the one converting AI into revenue fastest: annualised AI revenue passed \$1.8B in Q3 FY2026, \$2.3B in Q4 and \$2.6B by Q1 FY2027, against a stated ambition to become the world's largest AI-led technology services company.

What they sell: Application services, consulting, engineering, cloud and business process services, organised around a five-pillar strategy. AI runs through the WisdomNext platform, with AI reported as a distinct revenue line, and TCS is building a dedicated AI infrastructure business.

02 Where The Company Sits

TCS has the most concrete AI evidence base of any services firm in this app. Krithivasan projects AI could reach 20% of total revenue; 54 of the top 60 global clients are already running AI-embedded projects; and management reports 10–15% productivity improvements on active AI projects. That last number is the useful one for a portfolio programme, because it is a delivery metric rather than a sales metric. The other side is stark and worth stating plainly: headcount fell by 23,460 in the same year, concentrated in middle and senior management.

03 What To Pressure-Test

- Headcount fell 23,460 in FY2026, including roughly 12,200 confirmed cuts concentrated in middle and senior management
- Growth is respectable rather than strong, and management has acknowledged high single-digit growth was difficult to achieve
- The 20% AI revenue projection is a CEO statement of direction, not guidance
- Heavy exposure to the same offshore labour-arbitrage model that its own productivity gains are compressing

04 GIP Context

GIP: No publicly disclosed GIP relationship. TCS is the most likely incumbent at large PortCos with existing offshore application or infrastructure contracts. Its stated build of an AI infrastructure business is worth watching as a potential digital-infrastructure adjacency.

BlackRock: No publicly disclosed operating relationship.

Others at Tata Consultancy Services: Aarthi Subramanian (Executive Director, President & Chief Operating Officer)
