01 Overview

Reached \$5.25B of ending ARR in FY2026 — the fastest and only pure-play cybersecurity software company to do so — while expanding non-GAAP operating margin by 370 basis points.

Offering: The Falcon platform, sold as modules across endpoint, identity, cloud, exposure management and next-generation SIEM, with Charlotte AI providing agentic detection and response.

Key facts

HQ: Austin, Texas

Ownership: Public (Nasdaq: CRWD)

Revenue: Ending ARR of \$5.25B at FY2026 close (31 January 2026), up 24%, on a record \$1.01B of net new ARR — its first year above \$1B. Q4 FY2026 revenue of \$1.31B, up 23%, with non-GAAP operating margin of roughly 25%, up 370 basis points

Digital twin: No · **GenAI:** Yes (Charlotte AI, agentic SOC)

02 Use Cases & Reported Metrics

Sector	Deployment	Reported impact	Source
Platform consolidation	Falcon Flex, a flexible subscription model that lets customers commit spend and deploy across modules, positioned explicitly as the mechanism for consolidating fragmented...	\$1.69B of ending ARR from Falcon Flex accounts at FY2026 close, up over 120% year over year;	Link
Agentic security operations	Charlotte AI Agentic Response and Agentic Workflows for the security operations centre, extended through Charlotte AI AgentWorks built with NVIDIA Nemotron models, NeMo Data...	Positions always-on, continuously learning AI agents at the edge for security operations	Link
Managed services	EY US selected Falcon Next-Gen SIEM as the foundational platform powering its global cybersecurity managed services;	Extends reach through service-provider channels rather than direct sales alone	Link

03 Competitive Landscape

Other vendors in this market: Sand Technologies · Palantir Technologies · C3.ai · Cognite · Bentley Systems · AVEVA · IBM watsonx · Honeywell Forge

Where it sits: The platform consolidation thesis is doing the work here. Falcon Flex lets customers commit spend and draw down across modules, and the module adoption numbers show it landing — 49% of customers on six or more modules, 24% on eight or more.

04 GIP & BlackRock Connections

GIP became a wholly-owned BlackRock subsidiary in October 2024 and now operates as BlackRock's dedicated infrastructure-investment arm. Stakes below are standard institutional/index-fund positions unless otherwise noted.

Entity	Possible connection
Global Infrastructure Partners	No publicly disclosed GIP relationship. Security tooling is one of the more plausible areas for genuine portfolio-level leverage — consolidated commercial terms across PortCos
BlackRock	No publicly disclosed operating relationship; standard index holdings of CRWD only.

05 Sentiment

Customer: Retention is the number that matters in this category and it is strong — 97% gross retention with consistently strong net retention, which means customers are staying and spending more.

What supports the story

- First pure-play cybersecurity software company to reach \$5B of ending ARR, with a record \$1.01B of net new ARR
- 370 basis points of non-GAAP operating margin expansion to roughly 25% — growth and profitability improving together
- 97% gross retention with module adoption climbing across every tier

What to pressure-test

- Q4 FY2026 revenue of \$1.31B came in below the Wall Street consensus of roughly \$1.4B despite 23% growth
- The July 2024 outage remains the reference point for single-vendor concentration risk in critical infrastructure
- Management's \$10B ARR ambition implies sustained high growth against increasingly large comparatives

Employee: Not covered in this pass — headcount was not disclosed in the results reviewed and no reliable employer-review data was gathered. Treat as a gap.
