YoY growth

\$190B

Valuation (Aug 2026)

\$1.5B

Lakehouse run rate

01 Overview

Grew from a \$5.4B run rate in February 2026 to \$7B by Q2, at over 80% growth, and raised \$5B at a \$190B valuation in August 2026 despite being cash-flow positive. The core data warehouse alone is \$1.5B of run rate still growing at 100%.

Offering: The lakehouse platform combining data warehousing, engineering and ML, with Unity Catalog for governance. The newer agent layer is Lakebase (a database built for AI agents), Genie (a business-analysis agent), Agentbricks (embedding intelligence into...

Key facts

HQ: San Francisco, California

Ownership: Private. \$190B post-money valuation after a \$5B strategic round closed 13 August 2026, led by Coatue with Blackstone, MGX, T. Rowe Price accounts and Sixth Street Growth — up from \$134B eight months earlier. No S-1 filed

Revenue: \$7B annualised run rate as of Q2 2026, growing more than 80% year over year, and cash-flow positive. In February 2026 the run rate was \$5.4B, up 65%, with more than \$1.4B of that from AI

Digital twin: No · **GenAI:** Yes (agent infrastructure)

02 Use Cases & Reported Metrics

Sector	Deployment	Reported impact	Source
Core data platform	The lakehouse data warehouse, the original product and still the largest single line, used for analytics and as the governed foundation under AI workloads.	\$1.5B annualised run rate, still growing at approximately 100% year over year	Link
Agent infrastructure	Lakebase, a database purpose-built for AI agents, launched June 2025; Genie, an agent performing business analysis on demand;	Lakebase surpassed a \$100M revenue run rate within roughly a year of launch	Link
AI cost governance	Unity AI Gateway, which controls which models are used and at what cost — built for the token-cost pressure now affecting enterprise AI budgets.	Positioned as a direct response to rising AI token costs; a named use of the \$5B raise	Link

03 Competitive Landscape

Other vendors in this market: Snowflake

Where it sits: Databricks' pitch to an infrastructure portfolio is neutrality and governance: it positions itself as model-agnostic, letting customers run OpenAI, Anthropic, Google or open-source models on their own data without that data leaving their secure cloud environment.

04 GIP & BlackRock Connections

GIP became a wholly-owned BlackRock subsidiary in October 2024 and now operates as BlackRock's dedicated infrastructure-investment arm. Stakes below are standard institutional/index-fund positions unless otherwise noted.

Entity	Possible connection
Global Infrastructure Partners	No publicly disclosed GIP relationship. Worth noting that Blackstone participated in the August 2026 round — a peer infrastructure and private-markets investor taking a position in the vendor, which is context for any commercial...
BlackRock	No publicly disclosed operating relationship. Databricks is private; the August 2026 round was led by Coatue with Blackstone, MGX, T.

05 Sentiment

Customer: Ghodsi's own summary of the demand environment is that demand is crazy and that the world is focused on agents. The more telling detail is behavioural: customers who a year or two ago insisted on frontier proprietary models are now adopting open-source and...

What supports the story

- \$7B run rate growing over 80% year over year, and cash-flow positive — an unusual combination at this scale
- The core data warehouse is \$1.5B and still growing at ~100%, so the growth is not solely AI narrative
- Genuinely model-agnostic architecture keeps customer data inside the customer's own cloud environment

What to pressure-test

- Multibillion-dollar cloud commitments to all three hyperscalers create a fixed cost base regardless of demand
- Roughly \$20B raised over 20 months for a business that describes itself as cash-flow positive — the board's stated motivation was concern about a possible AI slump
- No S-1 filed and Ghodsi has said 2026 is a terrible year to go public; a listing is unlikely before Anthropic or OpenAI

Employee: Not covered in this pass — Databricks does not disclose headcount and no reliable employer-review data was gathered. The ~12,300 figure in circulation is a third-party estimate. Treat as a gap.
