\$14.7B

FY2026 revenue

\$620M

Advanced AI run rate

17.2%

EBIT margin

01 Overview

Delivered 3.9% constant-currency growth in FY2026 in what its CEO called an uncertain demand environment, with Advanced AI revenue crossing a \$620M annualised run rate. The segment that stands out is Engineering and R&D Services, which grew 9.8% — two and a half times the company average.

Offering: IT and business services, engineering and R&D services, and HCLSoftware products. The AI portfolio runs under AI Force and AI Foundry, with Advanced AI reported as a separate revenue line.

Key facts

HQ: Noida, India

Ownership: Public (NSE/BSE: HCLTECH)

Revenue: \$14.66B in FY2026 (year ended 31 March 2026), up 6% in USD and 3.9% at constant currency; services revenue up 4.8% at constant currency. EBIT margin of 17.2%, or 17.9% adjusted for one-time restructuring. FY2027 guidance of just 1–4% constant currency

Digital twin: Via engineering services · **GenAI:** Yes (AI Force, AI Foundry)

02 Use Cases & Reported Metrics

Sector	Deployment	Reported impact	Source
Engineering & R&D	Engineering and R&D Services for product-centric enterprises, semiconductor companies and deep technology clients — the segment most directly linked to physical and product engineering rather than corporate IT.	9.8% constant-currency growth for FY2026, against 3.9% for the company overall	Link
AI services	AI-led service offerings reported as a distinct Advanced AI revenue line, built on the AI Force and AI Foundry platforms.	Annualised Advanced AI revenue crossed \$620M in Q4 FY2026	Link
Commercial performance	New deal signings across services and software, with growth concentrated in technology and services, financial services and telecoms.	\$9.3B of new deal total contract value in FY2026; Technology and Services grew 15%, Financial Services 7.5%, Telecoms/Media 5.2%	Link

03 Competitive Landscape

Other vendors in this market: Accenture · Aziro · Bain & Company · Booz Allen Hamilton · Boston Consulting Group · Capgemini · Cognizant · Deloitte

Where it sits: The Engineering and R&D segment is the reason to look at HCLTech rather than its India-heritage peers for infrastructure work. It grew 9.8% in a year when the company grew 3.9%, which says clients with complex physical and product engineering problems are still spending while general IT discretionary demand is flat. That is the opposite of the pattern in most of this peer set.

04 GIP & BlackRock Connections

GIP became a wholly-owned BlackRock subsidiary in October 2024 and now operates as BlackRock's dedicated infrastructure-investment arm. Stakes below are standard institutional/index-fund positions unless otherwise noted.

Entity	Possible connection
Global Infrastructure Partners	No publicly disclosed GIP relationship. Engineering and R&D Services is the part worth testing against asset-level problems; the mainstream IT services business competes on the same ground as TCS, Infosys and Wipro.
BlackRock	No publicly disclosed operating relationship.

05 Sentiment

Customer: The demand picture splits cleanly by client type. Complex engineering clients are leaning in — Engineering and R&D grew 9.8% — while general discretionary IT spending is soft, with decisions being delayed. Geographically the US, the largest market, grew only 2.3% while the Rest of World grew 17.8% off a smaller base.

What supports the story

- Engineering and R&D Services grew 9.8% against 3.9% company growth — the clearest signal in this peer set that engineering demand is holding up
- Advanced AI crossed a \$620M annualised run rate and is reported as its own line
- Attrition improved to 12.5% from 13%, the lowest in its immediate peer group

What to pressure-test

- FY2027 guidance of 1–4% constant currency is the weakest forward outlook of any vendor in this wave
- The US, its largest geography, grew only 2.3% at constant currency
- Outsourcing costs rose from 13% to 14.2% of revenue, which pressures the margin advantage

Employee: Attrition fell to 12.5% on a trailing twelve-month basis from 13% a year earlier, and 11,744 freshers were hired against roughly 7,800 the previous year, so entry-level intake rose even as net addition stayed under 4,000.
