~\$42.3B

FY2025 revenue

~\$30B

International business

~7%

Operating margin

01 Overview

Japan's largest IT services company and, after absorbing NTT Ltd, a combined business and technology services operation of roughly \$30B outside the group's domestic base.

Offering: Systems integration, application and infrastructure managed services, and consulting — combined, since the NTT Ltd merger, with data centre and network infrastructure.

Key facts

HQ: Toyosu, K[■]it[■], Tokyo, Japan

Ownership: Subsidiary of NTT, Inc. — NTT DATA Group Corporation

Revenue: ¥4.64 trillion (approximately \$42.27B) in FY2025, with operating income of ¥323.9B (~\$2.95B) and net income of ¥142.5B (~\$1.3B). The international business, formed by merging NTT Ltd into NTT DATA, is described as a roughly \$30B operation, of which about \$18B sits outside Japan

Key people: Abhijit Dubey (President & Chief Executive Officer, NTT DATA, Inc.)

Digital twin: Not confirmed in this pass · **GenAI:** Yes (services)

02 Use Cases & Reported Metrics

Sector	Deployment	Reported impact	Source
Digital infrastructure R&D	Photonics-powered data centres, using light rather than electrical signals to transmit data — part of the NTT group's broader optical networking research agenda.	Positions NTT DATA as an infrastructure operator and researcher, not only an integrator	Link
Corporate structure	Merger of NTT Ltd into NTT DATA, consolidating international IT services, data centre and network operations under a single brand and leadership.	Created a business and technology services operation of roughly \$30B, with about \$18B generated outside Japan across...	Link
Group scale	The full NTT DATA Group, combining the Japanese domestic business with international operations, reported through NTT, Inc.	FY2025 revenue of ¥4.64 trillion (~\$42.27B), operating income of ¥323.9B, and 197,800 employees	Link

03 Competitive Landscape

Other vendors in this market: Accenture · Aziro · Bain & Company · Booz Allen Hamilton · Boston Consulting Group · Capgemini · Cognizant · Deloitte

Where it sits: NTT DATA's distinguishing feature for an infrastructure portfolio is that it is not purely a services firm — through the NTT group it owns data centre and network assets, and its research agenda includes photonics-based data centres using light rather than electrical signalling for transmission.

04 GIP & BlackRock Connections

GIP became a wholly-owned BlackRock subsidiary in October 2024 and now operates as BlackRock's dedicated infrastructure-investment arm. Stakes below are standard institutional/index-fund positions unless otherwise noted.

Entity	Possible connection
Global Infrastructure Partners	No publicly disclosed GIP relationship. Worth noting the dual position: NTT group data centre assets make it a potential counterparty in digital infrastructure as well as a services supplier.
BlackRock	No publicly disclosed operating relationship.

05 Sentiment

Customer: The most candid available assessment comes from Dubey himself, who has described the firm's central challenge as getting onto the radar of potential customers at all

What supports the story

- Roughly \$42B of group revenue makes it one of the largest integrators in the world, and larger than Capgemini
- Owns physical data centre and network infrastructure through the NTT group — rare among services firms
- Photonics data centre research is a genuine technical differentiator rather than a marketing position

What to pressure-test

- Brand recognition is the firm's own stated problem — it is frequently absent from Western vendor shortlists
- Operating margin of roughly 7% on group revenue is thin against Accenture or the India-heritage peer set
- Complex structure — group corporation, Japanese domestic entity and international entity — makes it harder to know which entity you are contracting with

Employee: Not covered in this pass — no reliable employer-review data was gathered and headcount is reported at group level without recent breakdown. Treat as a gap.
