Networking growth

01 Overview

FY2026 revenue of \$215.9B, up 65%, with Data Center at 90% of the total. Huang has said cloud GPUs are sold out, that NVIDIA expects at least \$1 trillion of cumulative Blackwell and Vera Rubin revenue through 2027, and bluntly that supply will fall short...

Offering: GPU and rack-scale accelerated computing — the Blackwell and Grace Blackwell platforms, with Vera Rubin ramping — plus NVLink interconnect, BlueField data processors, networking, and the CUDA software stack.

Key facts

HQ: Santa Clara, California

Ownership: Public (NASDAQ: NVDA)

Revenue: \$215.9B in FY2026 (year ended January 2026), up 65%, with Data Center at \$193.7B, up 68%. Q4 FY2026 revenue was a record \$62.3B, up 75%. Q1 FY2027 reached \$81.6B with Data Center up 92% to \$75.2B, and guidance of about \$91B for Q2 FY2027

Key people: Jensen Huang (Founder & Chief Executive Officer)

Digital twin: Yes (Omniverse) · **GenAI:** Yes (the substrate for most of it)

02 Use Cases & Reported Metrics

Sector	Deployment	Reported impact	Source
Physical AI	Robotics, autonomous mobility and industrial systems, including L4-ready mobility networks through a partnership with Uber and DRIVE-powered Mercedes-Benz vehicles, plus the...	\$6B of physical AI revenue reported in FY2026; automotive revenue rose 39% to a record \$2.3B	Link
Frontier AI compute	Strategic partnerships to deploy NVIDIA systems at gigawatt scale — at least 10 gigawatts for OpenAI's next-generation infrastructure, and Anthropic running on NVIDIA...	Alongside partnerships with Google Cloud, Microsoft, Oracle and xAI to build US AI infrastructure with hundreds of...	Link
Platform transition	The Vera Rubin platform, comprising six new chips co-designed for agentic AI workloads, with AWS, Google Cloud, Microsoft Azure and Oracle Cloud Infrastructure among the first to...	Targets up to a 10x reduction in inference token cost against Blackwell;	Link

03 Competitive Landscape

Other vendors in this market: Amazon Web Services · Anthropic · Google · Meta · Microsoft · OpenAI · Perplexity · xAI

Where it sits: Two things here matter to an infrastructure portfolio more than the headline numbers. First, NVIDIA reported \$6B of physical AI revenue in FY2026 — robotics, autonomous mobility, industrial systems — which makes it one of the few vendors in this app putting a disclosed figure against the category most relevant to operating assets.

04 GIP & BlackRock Connections

GIP became a wholly-owned BlackRock subsidiary in October 2024 and now operates as BlackRock's dedicated infrastructure-investment arm. Stakes below are standard institutional/index-fund positions unless otherwise noted.

Entity	Possible connection
Global Infrastructure Partners	No publicly disclosed GIP relationship. NVIDIA is relevant to the portfolio mainly as a supply constraint and a demand driver — its capacity decisions set the cost and availability of compute for every AI programme, and its...
BlackRock	No publicly disclosed operating relationship; standard index holdings of NVDA only.

05 Sentiment

Customer: Demand exceeds supply by NVIDIA's own account, which removes any normal negotiating dynamic — cloud GPUs are sold out and Grace Blackwell rack-scale systems have long been allocated.

What supports the story

- FY2026 revenue up 65% to \$215.9B with Data Center up 68% — growth at a scale with no precedent in semiconductors
- Non-GAAP gross margins in the low-to-mid 70s despite unprecedented volume
- \$6B of disclosed physical AI revenue — the category most relevant to operating infrastructure assets

What to pressure-test

- The stock fell after each of the three most recent results despite beating expectations 18 times in 20 quarters — expectations may have reached unattainable levels
- Customer concentration is extreme: a handful of hyperscalers and frontier labs drive the majority of Data Center revenue, and their capex plans are the single point of failure
- AMD's Helios rack-scale system is expected to compete directly with Vera Rubin

Employee: Not covered in this pass — headcount was not disclosed in the results reviewed and no reliable employer-review data was gathered.
