01 Overview

The best-capitalized, fastest-growing name in this market by far — GAAP-profitable, ~56% revenue growth, and a fast-scaling “AIP Bootcamp” go-to-market motion pulling U.S. commercial revenue up over 130% YoY.

Offering: Four core platforms: Gotham (defense/intelligence), Foundry (commercial enterprise data integration), Apollo (deployment infrastructure) and AIP (AI Platform, launched 2023) — lets organizations deploy LLMs directly against their own operational data.

Key facts

HQ: Denver, CO (relocated from Palo Alto; some 2026 reports cite a Miami-area office too)

Ownership: Public (Nasdaq: PLTR)

Revenue: \$4.48B (FY2025), up 56% YoY; FY2026 guidance raised to \$7.65–\$7.66B

Web: www.palantir.com · [LinkedIn](#)

Key people: Alex Karp (Co-Founder & CEO) · Stephen Cohen (Co-Founder & President) · Peter Thiel (Co-Founder & Chairman of the Board) · Shyam Sankar (Chief Technology Officer)

Digital twin: Partial (ontology-based data model, not a physical digital twin) · **GenAI:** Yes — AIP is the fastest-growing product line

02 Use Cases & Reported Metrics

Sector	Deployment	Reported impact	Source
Aerospace / manufacturing	Airbus — Skywise platform on Foundry	+33% production increase on the A350 aircraft line; Skywise now improves decision-making at 100+ airlines	Link
Energy	Oil & gas major — Foundry data integration	Scanned 300+ SAP data sets across 5 legacy ERPs; unlocked ~\$50M working capital in 2 weeks;	Link
Utilities	PG&E — wildfire risk & grid optimization	8–10 billion data points processed daily to inform wildfire mitigation and grid decisions for 16 million customers	Link

03 Competitive Landscape

Other vendors in this market: Sand Technologies · C3.ai · Cognite · Bentley Systems · AVEVA · IBM watsonx · Honeywell Forge · Siemens Xcelerator

Where it sits: Broadest platform ambition and by far the largest balance sheet in this market. Closest comparable to Sand on category ambition (“operating system” framing) but built for data/decisions generally, not physical-infrastructure control specifically.

04 GIP & BlackRock Connections

GIP became a wholly-owned BlackRock subsidiary in October 2024 and now operates as BlackRock’s dedicated infrastructure-investment arm. Stakes below are standard institutional/index-fund positions unless otherwise noted.

Entity	Possible connection
Global Infrastructure Partners	No named GIP portfolio company was confirmed as a Palantir customer in available sources. The sectoral overlap is real — Palantir markets Foundry/AIP explicitly for “critical infrastructure,” construction (named partners McCarthy and Kiewit), and government, territory that includes GIP-style assets...
BlackRock	Confirmed and substantial, but passive: BlackRock is one of Palantir’s largest institutional shareholders, holding roughly 5.5%–8.7% of shares outstanding across recent 13G/13F filings (an ~\$19.9B position as of...

05 Sentiment

Customer: Strong, vocal reference customers (BP, PG&E, NHS) appear repeatedly in Palantir’s own case studies and at its AIPCon customer events, but independent third-party review volume (G2/Gartner Peer Insights) is thin relative to its market cap

What supports the story

- Revenue growth accelerating — 56% YoY in FY2025, guiding to 61%+ for FY2026, GAAP-profitable since 2023
- AIP Bootcamp model converts roughly 75% of prospects into signed contracts; U.S. commercial revenue up 130%+ YoY
- S&P 500 inclusion (Sept 2024) and a fast-growing roster of blue-chip commercial reference customers

What to pressure-test

- Valuation is priced for perfection — among the most expensive large-cap software multiples in the market
- Deep ties to defense/intelligence work draw recurring criticism (ACLU and others) over predictive-policing use of Gotham
- Customer lock-in risk is real: once operations run on Foundry’s ontology, switching costs are very high

Employee: High talent density and real-world mission impact are the most-cited positives; work-life balance is the most-cited negative (2.8/5 on that sub-metric) alongside opaque post-cliff compensation communication.
