AI investment

01 Overview

\$56.9B of FY2025 revenue on 2.7% growth — the slowest of the Big Four — while cutting 5,600 roles and quietly dropping the previous leadership's pledge to add 100,000 people by mid-2026. Against that, it invested nearly \$1.5B in AI capability and upskilled over 315,000 of its own people.

Offering: Assurance, tax and legal, and advisory, with Strategy& as the premium strategy arm. New AI-specific services include Assurance for AI — independent assurance over whether AI systems are designed, deployed and operated responsibly.

Key facts

HQ: London, United Kingdom (PricewaterhouseCoopers International Limited; a network of member firms)

Ownership: Private network of member firms

Revenue: \$56.9B gross revenue for FY2025 (year ended 30 June 2025), up 2.7% in local currency and 2.9% in US dollars from \$55.4B. The Americas grew 5.5% to \$25.5B and EMEA 2.5% to \$22.5B, while Asia declined 4.1% to \$8.8B

Key people: Mohamed Kande (Global Chairman)

Digital twin: No · **GenAI:** Yes (advisory + assurance)

02 Use Cases & Reported Metrics

Sector	Deployment	Reported impact	Source
AI assurance	Assurance for AI, launched to provide independent assurance over AI systems — giving businesses confidence that systems are designed, deployed and operated responsibly and transparently, complementing rather than replacing...	Extends the audit franchise into AI governance, a service distinct from implementation consulting	Link
AI investment	Nearly \$1.5B invested during FY2025 to scale next-generation AI capabilities across the network, part of \$3.1B of total network investment, alongside 12 strategic acquisitions.	Over 315,000 PwC people upskilled in AI; the firm works with 82% of the Fortune Global 500	Link
Network performance	Revenue growth across most of the network, with the strongest performance in the US and Brazil and fee growth in Japan, South Korea and India despite a regional decline.	Americas up 5.5% to \$25.5B; EMEA up 2.5% to \$22.5B; Asia down 4.1% to \$8.8B	Link

03 Competitive Landscape

Other vendors in this market: Accenture · Aziro · Bain & Company · Booz Allen Hamilton · Boston Consulting Group · Capgemini · Cognizant · Deloitte

Where it sits: The most interesting thing PwC has built for an infrastructure portfolio is not a consulting practice but Assurance for AI — independent assurance over AI systems, which is a natural extension of audit into a domain most boards cannot yet evaluate.

04 GIP & BlackRock Connections

GIP became a wholly-owned BlackRock subsidiary in October 2024 and now operates as BlackRock's dedicated infrastructure-investment arm. Stakes below are standard institutional/index-fund positions unless otherwise noted.

Entity	Possible connection
Global Infrastructure Partners	No publicly disclosed GIP relationship. As with the other Big Four, check for an existing audit relationship at fund or PortCo level first — and note that if you want PwC's AI assurance work, that independence constraint cuts the other way and may be the point rather than the obstacle.
BlackRock	No publicly disclosed operating relationship.

05 Sentiment

Customer: PwC works with 82% of the Fortune Global 500, so the relationship base is intact. The demand signal is weaker than the peer set: 2.7% growth against Deloitte's 4.8%, KPMG's 5.1% and EY's 4.0%, with Asia declining outright.

What supports the story

- Assurance for AI is a genuinely differentiated service that leans on the audit franchise rather than competing head-on with implementation firms
- Nearly \$1.5B of AI investment in a single year, plus 12 strategic acquisitions
- Over 315,000 people upskilled in AI — the largest disclosed internal upskilling programme in this peer set

What to pressure-test

- Slowest growth of the Big Four at 2.7% local currency — roughly half Deloitte's and KPMG's rates
- Headcount fell 5,600 and the previous pledge to add 100,000 people by mid-2026 was quietly dropped
- Asia revenue declined 4.1%, the only outright regional decline among the Big Four this cycle

Employee: The direction is contraction: headcount down 5,600 to 364,000, roughly 1,500 roles cut at the US firm explicitly because attrition was at historic lows, and a growth pledge abandoned.
