SAP Gold Operations Partner

01 Overview

A 50-year-old specialist that does one thing: run mission-critical SAP and Oracle environments for over 1,000 customers, concentrated in manufacturing, automotive, energy and mining. It holds SAP Gold Partner status, Oracle, AWS Advanced, Microsoft Gold and IBM Silver partnerships. Offering: Managed cloud hosting and application managed services for SAP and Oracle estates — including E-Business Suite, JD Edwards, PeopleSoft, Hyperion and Siebel — across private, public, hybrid and multi-cloud, plus security services, consulting and systems integration.	Key facts HQ: Montréal, Québec, Canada Ownership: Private; roughly \$300M of funding and seven acquisitions per third-party trackers Revenue: Not disclosed. Third-party estimates vary wildly — \$231.8M, \$418.7M, a \$100–500M band and a \$500M–1B band all appear across different trackers. Treat all of them as unreliable and confirm directly Web: www.syntax.com · LinkedIn Key people: Christian Primeau (Global Chief Executive Officer) Digital twin: No · GenAI: Yes (AI-first managed services)

02 Use Cases & Reported Metrics

Sector	Deployment	Reported impact	Source
Manufacturing — shop floor	ShiftBook, purpose-built for SAP Digital Manufacturing, streamlining shift handovers and connecting frontline teams to drive shop-floor performance.	Takes Syntax into operational technology rather than corporate IT — the layer closest to asset performance	Link
Application managed services	AI-First Application Managed Services for SAP solutions, launched April 2026, applying agentic AI to the ongoing operation of SAP estates rather than to implementation projects.	Repositions a traditional managed-services business around AI-driven operations	Link
Partner credentials	Two decades of Gold status as a certified SAP Operations Partner, with new certifications added in June 2026 for SAP Business AI operations and SAP security operations.	Specific accreditation for operating SAP Business AI — a narrower and more verifiable credential than general AI capability claims	Link

03 Competitive Landscape

Other vendors in this market: Accenture · Aziro · Bain & Company · Booz Allen Hamilton · Boston Consulting Group · Capgemini · Cognizant · Deloitte Where it sits: Syntax is the most asset-adjacent of the smaller vendors in this app, and ShiftBook is the reason. Released in May 2026 and purpose-built for SAP Digital Manufacturing, it handles shift handovers, connects frontline teams and targets shop-floor performance — which is operational technology territory, not corporate IT. Its client base is already concentrated in manufacturing, automotive, energy and mining.

04 GIP & BlackRock Connections

GIP became a wholly-owned BlackRock subsidiary in October 2024 and now operates as BlackRock’s dedicated infrastructure-investment arm. Stakes below are standard institutional/index-fund positions unless otherwise noted.	
Entity	Possible connection
Global Infrastructure Partners	No publicly disclosed GIP relationship. The plausible fit is at a single asset-heavy PortCo running SAP or Oracle, particularly in manufacturing or energy, rather than as a portfolio-level supplier.
BlackRock	None identified.

05 Sentiment

Customer: Little independent evidence is available. The strongest indirect signal is longevity in a demanding niche — two decades of SAP Operations Partner Gold status and over 1,000 customers running mission-critical estates, where switching costs are high and poor service surfaces quickly. What supports the story • Deep, verifiable specialisation in running SAP and Oracle estates — including legacy platforms like JD Edwards and PeopleSoft that larger firms deprioritise • ShiftBook is genuine operational-technology capability aimed at the shop floor, not repackaged corporate IT • Specific SAP Business AI operations and security operations certifications rather than generic AI claims	What to pressure-test • No disclosed financials, and third-party revenue estimates differ by a factor of four — from \$232M to over \$500M • At roughly 2,000 people, surge capacity and geographic coverage are limited • Seven acquisitions and roughly \$300M of funding imply a private-equity-style roll-up, which carries integration and ownership-horizon questions
--	---

Employee: Not covered in this pass. Headcount is reported at roughly 2,000–2,200 across six locations, up from about 1,400 in 2021. No reliable employer-review data was gathered.

Sources: Syntax public filings/website, company fact sheets, Wikipedia, PitchBook/Crunchbase/Datanyze/BuiltIn profiles, Glassdoor employer reviews, vendor case studies and press releases as of Sept. 2026. Figures marked “est.” or “not disclosed” are third-party estimates or unavailable — not company-confirmed — validate in diligence. Part of the Physical AI / Industrial AI for Critical Infrastructure market landscape.
