01 Overview

The smallest vendor tracked in this app by a wide margin, and the least documented. It positions around complex customer and operational workflows that do not fit inside a single platform, with a stated approach of defining the business problem before selecting technology.

Offering: Three specialist practices — Enterprise AI (AI agents, intelligent automation, enterprise knowledge, document intelligence and governed production solutions), Salesforce (Agentforce, Data Cloud, Service Cloud, Sales Cloud), and Data Engineering — supported by Global Technology Delivery across the United States and India.

Key facts

HQ: San Ramon, California, with delivery in Bengaluru, Karnataka, India

Ownership: Private

Revenue: Not disclosed

Web: www.tribolatech.com · [LinkedIn](#)

Key people:

Digital twin: No · **GenAI:** Yes (Enterprise AI practice)

02 Use Cases & Reported Metrics

Sector	Deployment	Reported impact	Source
Enterprise AI	AI agents, intelligent automation, enterprise knowledge, document intelligence and governed production solutions applied to real enterprise work rather than pilots.	No client outcomes or metrics are published	Link
Salesforce	Customer operations transformation using Salesforce, Agentforce, Data Cloud, Service Cloud and Sales Cloud with connected AI experiences.	No client outcomes or metrics are published	Link
Data engineering	Building data platforms and pipelines intended to power analytics, Salesforce and enterprise AI from a trusted foundation.	No client outcomes or metrics are published	Link

03 Competitive Landscape

Other vendors in this market: Accenture · Aziro · Bain & Company · Booz Allen Hamilton · Boston Consulting Group · Capgemini · Cognizant · Deloitte

Where it sits: Tribola's stated method — start with the workflow, the experience, the information required and the outcome that needs to improve, then decide the combination of AI, Salesforce, data and engineering — is the right sequence, and it is the sequence most large integrators claim and fewer follow. At this size that claim is at least plausible, because a small firm cannot afford to lead with a platform it happens to resell.

04 GIP & BlackRock Connections

GIP became a wholly-owned BlackRock subsidiary in October 2024 and now operates as BlackRock's dedicated infrastructure-investment arm. Stakes below are standard institutional/index-fund positions unless otherwise noted.

Entity	Possible connection
Global Infrastructure Partners	No publicly disclosed GIP relationship. At this scale the only realistic fit is a single scoped workstream at one PortCo — most plausibly Salesforce or data engineering work — and it would need direct reference checking rather than desk diligence.
BlackRock	None identified.

05 Sentiment

Customer: No customer evidence of any kind was found in this pass — no named clients, no case studies, no testimonials, no third-party reviews. That is not a negative signal about quality; it simply means there is nothing to assess from outside.

What supports the story

- Narrow, coherent focus on three practices rather than claiming end-to-end capability
- Stated method puts the business problem ahead of the platform, which is the right sequence
- Small enough that senior involvement in an engagement is credible

What to pressure-test

- The least-documented vendor in this app — no financials, no headcount, no named leadership, no client references
- Corporate identity is unclear from public material: Tribola Tech, TribolaTech Inc and Infinite Tek Inc all appear, with an infini-tek.com contact address
- No published evidence of delivery at enterprise scale

Employee: Not covered — no headcount disclosure and no employer-review data of any kind was found.

Sources: Tribola Tech public filings/website, company fact sheets, Wikipedia, PitchBook/Crunchbase/Datanyze/BuiltIn profiles, Glassdoor employer reviews, vendor case studies and press releases as of Sept. 2026. Figures marked "est." or "not disclosed" are third-party estimates or unavailable — not company-confirmed — validate in diligence. Part of the Physical AI / Industrial AI for Critical Infrastructure market landscape.
