ARR growth

\$481M

Q4 revenue

\$150M

Non-GAAP op income

01 Overview

\$1.853B of ARR growing 11%, with the argument that enterprises scaling AI need something that executes reliably rather than something that reasons well.

Offering: The UiPath Platform for Agentic Automation and Orchestration, combining deterministic robotic process automation with agentic AI and enterprise orchestration, plus built-in security and governance.

Key facts

HQ: New York, New York

Ownership: Public (NYSE: PATH)

Revenue: Q4 FY2026 revenue of \$481M, up 14%, with ARR of \$1.853B at 31 January 2026, up 11%. GAAP operating income of \$80M and non-GAAP operating income of \$150M. ARR grew steadily through the year — \$1.693B, \$1.723B, \$1.782B, \$1.853B

Key people: Daniel Dines (Founder, Chief Executive Officer & Executive Chairman) · Raghu Malpani (Chief Product & Technology Officer)

Digital twin: No · **GenAI:** Yes (agentic automation)

02 Use Cases & Reported Metrics

Sector	Deployment	Reported impact	Source
Platform positioning	Deterministic automation, agentic AI and enterprise orchestration brought together on a single governed platform, with tools for building and testing agents and expanded built-in...	ARR of \$1.853B at FY2026 close, up 11%, with GAAP operating income of \$80M and non-GAAP operating income of \$150M	Link
Healthcare	Agentic AI solutions for healthcare providers and payers covering medical records summarisation, claim denial prevention and resolution, and prior authorisation, using...	Targets revenue cycle management — a high-volume, compliance-bound process where deterministic execution matters	Link
ERP modernisation	UiPath's own migration to SAP S/4HANA, delivered with Deloitte, using agentic automation to modernise its internal ERP.	93% clean core in solution design and 88% clean core across the overall implementation	Link

03 Competitive Landscape

Other vendors in this market: Sand Technologies · Palantir Technologies · C3.ai · Cognite · Bentley Systems · AVEVA · IBM watsonx · Honeywell Forge

Where it sits: The distinction UiPath draws is worth taking seriously for infrastructure operations: deterministic automation does the same thing every time, agentic AI adapts, and mission-critical processes often need the former with the latter layered on selectively.

04 GIP & BlackRock Connections

GIP became a wholly-owned BlackRock subsidiary in October 2024 and now operates as BlackRock's dedicated infrastructure-investment arm. Stakes below are standard institutional/index-fund positions unless otherwise noted.

Entity	Possible connection
Global Infrastructure Partners	No publicly disclosed GIP relationship. Most relevant to the Corporate Functions Efficiency area of the reference model — back-office and shared-services process automation
BlackRock	No publicly disclosed operating relationship; standard index holdings of PATH only.

05 Sentiment

Customer: Dines reports that customers consistently say automation and agentic AI are stronger together, and that enterprises want a unified platform rather than standalone tools.

What supports the story

- Profitable on both a GAAP and non-GAAP basis, which is rare among AI-positioned software vendors at this scale
- The deterministic-plus-agentic argument is genuinely differentiated and matters in regulated or safety-relevant processes
- Completed a \$1B buyback and authorised a further \$500M — a capital-return posture, not a cash-burn one

What to pressure-test

- ARR growth of 11% is the slowest of any software vendor tracked in this app, and it was flat at 11–12% across all four quarters
- Net new ARR of \$31M in a single quarter is small against a \$1.7B base
- RPA is the category most directly threatened by general-purpose agents — the repositioning is necessary, not opportunistic

Employee: Not covered in this pass — headcount was not disclosed and no employer-review data was gathered. One leadership signal: CTO Raghu Malpani took on an expanded role as Chief Product and Technology...
