01 Overview

A niche engineering partner rather than a scale integrator — roughly 1,200 people against Accenture's 799,000. Its stated focus is product engineering for enterprises, high-growth ISVs and AI-first companies, with storage, infrastructure and QA as the historical strengths carried over from the MSys years. Offering: Infrastructure engineering, digital engineering, AI/ML engineering, DevSecOps and AIOps, QA automation, hybrid and multi-cloud, and observability. Productised assets include Aziron (an enterprise agent execution platform), CAWi.ai, a RAG application framework, an AIOps accelerator and CodeLedger.	Key facts HQ: Alpharetta, Georgia, USA; delivery centres in India, with presence in Australia, Malaysia and Vietnam Ownership: Private; founder-led Revenue: Approximately \$292.5M per a third-party company directory. This figure is not company-disclosed and implies revenue per head far above comparable firms of this size — treat it as unverified and confirm directly in any diligence Web: www.aziro.com/en · LinkedIn Key people: Sanjay Sehgal (Founder, Chairman & Chief Executive Officer) Digital twin: No · GenAI: Yes (services + Aziron platform)

02 Use Cases & Reported Metrics

Sector	Deployment	Reported impact	Source
Networking — QA	Local LLM-powered QA agents auto-generating, optimising and executing test scripts across a networking company's software stack, with no internet connectivity or cloud dependency.	80% reduction in manual testing; 100% private on-premise inference	Link
Financial services	Intelligent payment orchestration with cognitive workflows and embedded anomaly detection across the financial lifecycle.	60% improvement in processing speed; 100% accuracy in audit reconciliation	Link
Insurance	Cloud-agnostic AI-native claims management platform with predictive triage, automated case routing and built-in observability.	40% reduction in infrastructure cost; 99.9% uptime with intelligent failover	Link

03 Competitive Landscape

Other vendors in this market: Accenture · Bain & Company · Booz Allen Hamilton · Boston Consulting Group · Capgemini · Cognizant · Deloitte · DXC Technology

Where it sits: Aziro competes on depth in a narrow band — infrastructure and storage engineering, QA automation, DevSecOps — not on breadth. For a portfolio programme that makes it a specialist supplier for defined engineering work rather than a transformation partner.

04 GIP & BlackRock Connections

GIP became a wholly-owned BlackRock subsidiary in October 2024 and now operates as BlackRock's dedicated infrastructure-investment arm. Stakes below are standard institutional/index-fund positions unless otherwise noted.

Entity	Possible connection
Global Infrastructure Partners	No publicly disclosed GIP relationship. At this size, an engagement would most plausibly arise at a single PortCo for a scoped engineering workstream rather than as a portfolio-level supplier.
BlackRock	None identified.

05 Sentiment

Customer: The only attributed customer voice found in this pass is a Nutanix management testimonial praising responsiveness on CVE remediation. Every other case study is anonymised by industry.

What supports the story	What to pressure-test
• Deep specialisation in infrastructure, storage and QA engineering — areas the large integrators staff thinly • Founder-led and small enough that senior attention on an engagement is credible rather than contractual • ISO 27001 certified and Great Place To Work certified	• Revenue figure in circulation is a third-party directory estimate and looks high against a ~1,200 headcount — verify directly • Almost all case-study impact figures are vendor-reported and anonymised, with no independent validation available • The AI-native brand is about a year old; the underlying business is a 2007-vintage engineering services firm

Employee: Great Place To Work certified, per the company's own announcements. No independent employer-review data was gathered in this pass.

Sources: Aziro public filings/website, company fact sheets, Wikipedia, PitchBook/Crunchbase/Datanyze/BuiltIn profiles, Glassdoor employer reviews, vendor case studies and press releases as of Sept. 2026. Figures marked "est." or "not disclosed" are third-party estimates or unavailable — not company-confirmed — validate in diligence. Part of the Physical AI / Industrial AI for Critical Infrastructure market landscape.
