Employees

\$14.4B

2025 revenue

25%

Revenue from AI

40%+

AI & tech services

01 Overview

\$14.4B of 2025 revenue across 33,500 people, with AI and technology services now over 40% of the total and AI-specific work at 25% — roughly \$3.6B. It is the first of the strategy firms to publish that figure, which makes it the benchmark the others get measured against.

Offering: Strategy and transformation consulting, paired with BCG X — an in-house build arm that develops bespoke AI solutions and deploys industry platforms such as Auto AI, Retail AI and Deep Customer Engagement AI directly into client systems. The BCG X AI Science Institute launched in 2025.

Key facts

HQ: Boston, Massachusetts

Ownership: Private partnership

Revenue: \$14.4B in 2025, up 7% from \$13.5B in 2024 — a 22nd consecutive year of growth, though a slower pace than the 10% recorded the prior year

Web: www.bcg.com · [LinkedIn](#)

Key people: Christoph Schweizer (Chief Executive Officer) · Rich Lesser (Global Chair (CEO 2013–2021))

Digital twin: Client-specific builds · **GenAI:** Yes (BCG X)

02 Use Cases & Reported Metrics

Sector	Deployment	Reported impact	Source
Applied AI — enterprise	BCG X builds bespoke AI solutions and embeds industry-specific platforms (Auto AI, Retail AI, Deep Customer Engagement AI) directly into client systems, with named applied-AI clients including IBM, Reckitt and Foxconn.	AI-related work reached 25% of 2025 revenue — roughly \$3.6B — with AI services growing 25% year over year	Link
Delivery methodology	The 10-20-70 approach allocates 10% of effort to algorithms, 20% to technology and data, and 70% to people and process — an explicit position that AI programmes fail on adoption rather than modelling.	Adopted as the firm's standard framing across AI engagements	Link
Internal AI adoption	Firm-wide AI upskilling with employees using AI tools daily, and a technical bench expanded through hiring of AI engineers, data scientists and IT architects.	Nearly 4,000 BCG employees actively developing and scaling AI workflows through advanced coding and automation; headcount grew by 500 to 33,500	Link

03 Competitive Landscape

Other vendors in this market: Accenture · Aziro · Bain & Company · Booz Allen Hamilton · Capgemini · Cognizant · Deloitte · DXC Technology

Where it sits: BCG's distinguishing move is structural, not rhetorical: BCG X means it builds and deploys into client systems rather than handing over a recommendation, which puts it in genuine overlap with systems integrators on delivery while retaining strategy-firm pricing.

04 GIP & BlackRock Connections

GIP became a wholly-owned BlackRock subsidiary in October 2024 and now operates as BlackRock's dedicated infrastructure-investment arm. Stakes below are standard institutional/index-fund positions unless otherwise noted.

Entity	Possible connection
Global Infrastructure Partners	No publicly disclosed GIP relationship. BCG's published AI platform portfolio skews to consumer-facing sectors, so relevance to energy, transport, digital and water assets would need to be tested rather than assumed.
BlackRock	None publicly disclosed.

05 Sentiment

Customer: Twenty-two consecutive years of growth and expansion across all regions is the strongest available proxy, since BCG publishes few attributable client outcomes. Named applied-AI clients — IBM, Reckitt, Foxconn

What supports the story

- First strategy firm to publish an AI revenue figure — 25% of \$14.4B, about \$3.6B — which sets the benchmark for the category
- BCG X provides genuine build-and-deploy capability rather than recommendation-only consulting
- 22nd consecutive year of growth with expansion across all regions

What to pressure-test

- Growth slowed to 7% in 2025 from 10% in 2024, while AI revenue grew 25% — implying the non-AI business is close to flat
- Headcount grew only 500 in a year in which AI revenue grew 25%, which raises a question about delivery capacity or leverage
- Published AI platforms are automotive, retail and customer engagement — no infrastructure-sector platform is disclosed

Employee: The firm reports daily AI tool use across staff and heavy investment in AI upskilling, with hiring concentrated in technical roles. No independent employer-review data was gathered in this pass, so this reflects the firm's own account.

Sources: Boston Consulting Group public filings/website, company fact sheets, Wikipedia, PitchBook/Crunchbase/Datanyze/BuiltIn profiles, Glassdoor employer reviews, vendor case studies and press releases as of Sept. 2026. Figures marked "est." or "not disclosed" are third-party estimates or unavailable — not company-confirmed — validate in diligence. Part of the Physical AI / Industrial AI for Critical Infrastructure market landscape.
