\$11.2B

FY2026 revenue

\$38B

Backlog (record)

1.1x

Book-to-bill

01 Overview

The largest pure-play US government technology firm, with deeper operational experience in critical national infrastructure than any commercial consultancy. FY2026 was, in its CEO's words, the most challenging year it has faced as a public company — revenue down 6.4%, headcount down 12% — while backlog hit a record \$38B.

Offering: Mission technology for US federal agencies — AI, cyber, defence technology and digital transformation — delivered increasingly as products and outcome-based contracts rather than staffed services. Expanding into commercial critical infrastructure through the Defy Security acquisition.

Key facts

HQ: McLean, Virginia

Ownership: Public (NYSE: BAH)

Revenue: \$11.2B in FY2026 (year ended 31 March 2026), down 6.4%; adjusted EBITDA \$1.23B; record backlog of \$38B with a trailing twelve-month book-to-bill of 1.1x

Key people: Horacio Rozanski (Chairman, President & Chief Executive Officer)

Digital twin: Partner-delivered · **GenAI:** Yes (agentic cyber and mission systems)

02 Use Cases & Reported Metrics

Sector	Deployment	Reported impact	Source
Critical infrastructure — cyber	Acquisition of Defy Security to scale cyber product sales and expand reach into the commercial critical-infrastructure market, alongside a shift toward agentic AI	90% increase in Other Transaction Authority proposal submissions, a leading indicator of the shift to non-linear, product-led growth	Link
AI partnerships	Partnership with OpenAI to advance AI across national security and critical infrastructure missions, adding to an existing network of technology partnerships with NVIDIA, AWS and venture capital firms.	Positions commercial frontier models inside accredited federal mission environments	Link
Federal AI adoption	A Booz Allen survey published in its Velocity series found a widening gap between deployment of agentic AI systems in federal agencies and trust in them.	Frames the firm's accreditation and assurance work as the commercial opportunity	Link

03 Competitive Landscape

Other vendors in this market: Accenture · Aziro · Bain & Company · Boston Consulting Group · Capgemini · Cognizant · Deloitte · DXC Technology

Where it sits: Of every firm in this set, Booz Allen has the most directly transferable experience in operating and defending critical infrastructure, because that is what federal mission work is. The strategic shift underway makes it more relevant to an infrastructure portfolio, not less: the Defy Security acquisition is explicitly aimed at scaling cyber product sales into commercial critical infrastructure, and it has built partnerships...

04 GIP & BlackRock Connections

GIP became a wholly-owned BlackRock subsidiary in October 2024 and now operates as BlackRock's dedicated infrastructure-investment arm. Stakes below are standard institutional/index-fund positions unless otherwise noted.

Entity	Possible connection
Global Infrastructure Partners	No publicly disclosed GIP relationship. Its stated push into commercial critical infrastructure cyber makes it a plausible inbound approach rather than an outbound search — and its work sits closest to the Technology / Governance / Security prerequisite in the reference model.
BlackRock	No publicly disclosed operating relationship; standard index holdings of BAH only.

05 Sentiment

Customer: Demand signal and revenue have diverged, which is unusual and worth understanding before drawing conclusions. Backlog hit a record \$38B with a 1.1x book-to-bill while revenue fell 6.4%

What supports the story

- Record \$38B backlog and 1.1x book-to-bill despite a 6.4% revenue decline — demand is intact
- Net income rose to \$205M in Q4 FY2026 even as revenue fell, on cost discipline and contract execution
- Unmatched operational experience in critical national infrastructure, now being pointed at commercial buyers

What to pressure-test

- FY2026 revenue fell 6.4% to \$11.2B and Q4 fell 6.4% — described by the CEO as the most challenging year as a public company
- Headcount down 12% year over year, which constrains near-term delivery capacity
- Revenue remains overwhelmingly dependent on US federal budgets and procurement timing — a single shutdown moved \$110M around

Employee: The verifiable signal is structural rather than sentiment-based: headcount fell 12% in FY2026 through a delayering and cost reduction programme, and management has stated explicitly that it intends to break the historical link between headcount...
