01 Overview

The largest European-headquartered integrator, and the one in this set with the most credible physical-engineering capability through Capgemini Engineering. 2025 was a year of aggressive reshaping: €3.8B deployed on acquisitions, headcount up 24%, and a €700M restructuring programme announced to reorganise the workforce around...

Offering: Strategy, technology and engineering services plus digital business process operations. Distinct brands sit underneath: Capgemini Engineering (industrial and product engineering), Sogeti, frog, Cambridge Consultants and Synapse Product Development. WNS, acquired in 2025, added intelligent operations at scale.

Key facts

HQ: Paris, France

Ownership: Public (Euronext Paris: CAP; CAC 40 constituent)

Revenue: €22.465B in 2025, up 1.7% reported and 3.4% at constant currency, ahead of guidance; Q4 accelerated sharply to 10.6% constant currency. Operating margin held at 13.3%; net profit attributable to shareholders fell 4.2% to €1.6B

Key people: Aiman Ezzat (Chief Executive Officer) · Nive Bhagat (Chief Financial Officer) · Paul Hermelin (Chairman of the Board)

Digital twin: Via Capgemini Engineering · **GenAI:** Yes (>10% of Q4 bookings)

02 Use Cases & Reported Metrics

Sector	Deployment	Reported impact	Source
Firm-wide AI	AI integrated across the service portfolio and into delivery itself, with the partner ecosystem used to shorten time to value. Ezzat has framed the strategy as pivoting the group to be the catalyst for enterprise-wide AI adoption.	Generative and agentic AI accounted for over 10% of Group bookings in Q4 2025	Link
Intelligent operations	Acquisition of WNS (approximately \$3.3B) to build digital business process services, alongside Cloud4C. Ezzat stated demand was rising before the acquisition, which is what prompted it.	€3.8B deployed on acquisitions in 2025; Q4 constant-currency growth of 10.6% with a significant contribution from the acquired units	Link
Workforce restructuring	A €700M restructuring plan to adapt the workforce to AI-driven delivery, running alongside a 24% headcount increase driven by the WNS integration.	Offshore workforce grew 42% to 279,200 — now 66% of the total	Link

03 Competitive Landscape

Other vendors in this market: Accenture · Aziro · Bain & Company · Booz Allen Hamilton · Boston Consulting Group · Cognizant · Deloitte · DXC Technology

Where it sits: Capgemini is the integrator whose structure most closely matches infrastructure work — Capgemini Engineering does product and industrial engineering, not just IT, which is a different proposition from the India-heritage firms and from the Big Four.

04 GIP & BlackRock Connections

GIP became a wholly-owned BlackRock subsidiary in October 2024 and now operates as BlackRock's dedicated infrastructure-investment arm. Stakes below are standard institutional/index-fund positions unless otherwise noted.

Entity	Possible connection
Global Infrastructure Partners	No publicly disclosed GIP relationship. Capgemini Engineering is the part worth testing for infrastructure assets — it addresses physical product and systems engineering rather than corporate IT, which maps to the Asset Optimization area of the reference model rather than Corporate Functions.
BlackRock	No publicly disclosed operating relationship; standard institutional holdings only.

05 Sentiment

Customer: The demand signal management points to is a greater number of large transformational deals, with cloud, data & AI and digital business process services driving it. Capgemini publishes few attributable client outcomes, so there is limited independent evidence to weigh;

What supports the story

- Capgemini Engineering gives it genuine physical and industrial engineering capability, which most integrators in this set lack
- Generative and agentic AI already above 10% of Q4 bookings
- Exceeded its own revenue guidance in a difficult macro environment, and held operating margin at 13.3%

What to pressure-test

- Reported growth was only 1.7%; the headline Q4 acceleration leaned substantially on acquisitions rather than the existing base
- Net debt more than doubled to €5.3B after €3.8B of acquisition spend
- Net profit fell 4.2% despite revenue growth

Employee: The structural signals are mixed and worth weighing over any sentiment score: headcount rose 24%, almost entirely through the WNS integration, while a €700M restructuring programme reshapes the existing workforce around AI delivery.
