01 Who You're Meeting

Julie Sweet — Chair & Chief Executive Officer, Accenture.

In role: CEO since September 2019; Chair since September 2021

Today: Sets Accenture's strategy and operations across roughly 799,000 people, and has driven the firm's reinvention around AI delivery — including the creation of Reinvention Services as an AI-focused integrated division.

A lawyer by training rather than a technologist, which is unusual for the role and shapes how she engages: she came up through governance and commercial risk, not delivery. She spent ten years as a partner at Cravath, Swaine & Moore working on M&A and corporate law for Fortune 500 clients before joining Accenture in 2010 as General Counsel. She ran Accenture's largest geography, North America, for four years before taking the global CEO role.

Career: Chief Executive Officer (Chair from 2021), Accenture; Chief Executive Officer, North America, Accenture; General Counsel, Chief Compliance Officer & Corporate Secretary, Accenture; Partner, M&A and corporate law, Cravath, Swaine & Moore LLP

Education: J.D., Columbia Law School; B.A., Claremont McKenna College

The company: The scale player in technology services: ~799,000 people, \$69.7B of FY2025 revenue, and \$80.6B of new bookings. It has partnered with 195 of its top 200 clients for ten years or more, which makes it the default incumbent inside most large enterprises rather than a challenger.

What they sell: Strategy & Consulting, Technology, Operations and Song, delivered through industry groups and a large offshore delivery network. Its AI delivery runs on internal platforms such as GenWizard, and it reports generative and agentic AI as a separate revenue line.

02 Where The Company Sits

Accenture and Deloitte are now effectively tied at the top — Deloitte reported \$70.5B for the year ended 31 May 2025 against Accenture's \$69.67B for the year ended 31 August 2025, though the fiscal years do not line up. Accenture's differentiator is not strategy advice but delivery capacity at scale, and it is the one firm in this set that discloses AI as a reported revenue line. For a PE owner the relevant question is whether you are buying scarce expertise or rented capacity — Accenture is unambiguously the latter, and priced accordingly.

03 Talking Points

- Her framing is reinvention and value delivered, not technology for its own sake — lead with the business outcome.
- The legal and governance background means AI risk, compliance and contracting are native territory, not a deflection.
- FY2026 growth guidance of 2–5% is materially below FY2025's 7%; she will expect you to know that.

What to pressure-test about the company:

- Growth has slowed materially: FY2026 guidance of 2–5% local currency against 7% delivered in FY2025
- A six-month business optimisation programme took a \$615M charge in Q4 FY2025, including \$344M of severance
- Federal business (AFS) is a drag on FY2026 growth, worth about 1.5 points

04 GIP Context

GIP: No publicly disclosed GIP relationship. Accenture works across every infrastructure sector GIP invests in, so any engagement is most likely to arrive through a PortCo's existing master services agreement rather than at fund level. Validate internally before assuming a clean slate.

BlackRock: No publicly disclosed operating relationship. BlackRock funds hold ACN as a standard index position — a capital-markets fact, not evidence of a commercial relationship.

Others at Accenture: Karthik Narain (Group Chief Executive, Technology & Chief Technology Officer); John Walsh (Chief Operating Officer)
