01 Who You're Meeting

Karthik Narain — Group Chief Executive, Technology & Chief Technology Officer, Accenture.

In role: Group Chief Executive, Technology since 2023; added CTO from 1 September 2024

Today: Leads Accenture's Technology business — Cloud First, Data & AI, enterprise and industry platforms, Security, and the ecosystem and advanced technology centres — and owns the firm's technology strategy.

Joined Accenture in 2015 and rose through the technology organisation rather than arriving from outside. He led Technology for the Communications, Media & Technology industry group and Technology in North America, then led Accenture Cloud First and Data & AI, nearly tripling the firm's cloud-certified workforce. He succeeded Paul Daugherty in the CTO role when Daugherty retired after a 38-year career. His own career spans about 25 years across financial services, high tech and software platforms.

Career: Group Chief Executive, Technology & Chief Technology Officer, Accenture; Group Chief Executive, Technology, Accenture; Lead, Accenture Cloud First and Data & AI, Accenture; Technology lead, Communications Media & Technology, and Technology North America, Accenture

The company: The scale player in technology services: ~799,000 people, \$69.7B of FY2025 revenue, and \$80.6B of new bookings. It has partnered with 195 of its top 200 clients for ten years or more, which makes it the default incumbent inside most large enterprises rather than a challenger.

What they sell: Strategy & Consulting, Technology, Operations and Song, delivered through industry groups and a large offshore delivery network. Its AI delivery runs on internal platforms such as GenWizard, and it reports generative and agentic AI as a separate revenue line.

02 Where The Company Sits

Accenture and Deloitte are now effectively tied at the top — Deloitte reported \$70.5B for the year ended 31 May 2025 against Accenture's \$69.67B for the year ended 31 August 2025, though the fiscal years do not line up. Accenture's differentiator is not strategy advice but delivery capacity at scale, and it is the one firm in this set that discloses AI as a reported revenue line. For a PE owner the relevant question is whether you are buying scarce expertise or rented capacity — Accenture is unambiguously the latter, and priced accordingly.

03 Talking Points

- He owns both the technology strategy and the Technology P&L, so he can commit on both capability and commercials in one conversation.
- Cloud and data foundations are his home ground — a good route into the Data Foundation prerequisite rather than a use-case discussion.
- Ecosystem partnerships sit under him, which matters if you want Accenture to deliver on a specific vendor's stack.

What to pressure-test about the company:

- Growth has slowed materially: FY2026 guidance of 2–5% local currency against 7% delivered in FY2025
- A six-month business optimisation programme took a \$615M charge in Q4 FY2025, including \$344M of severance
- Federal business (AFS) is a drag on FY2026 growth, worth about 1.5 points

04 GIP Context

GIP: No publicly disclosed GIP relationship. Accenture works across every infrastructure sector GIP invests in, so any engagement is most likely to arrive through a PortCo's existing master services agreement rather than at fund level. Validate internally before assuming a clean slate.

BlackRock: No publicly disclosed operating relationship. BlackRock funds hold ACN as a standard index position — a capital-markets fact, not evidence of a commercial relationship.

Others at Accenture: Julie Sweet (Chair & Chief Executive Officer); John Walsh (Chief Operating Officer)
