01 Who You're Meeting

Caspar Herzberg — Chief Executive Officer, AVEVA.

In role: CEO since March 2023

Today: Runs AVEVA as a Schneider Electric company, integrating three software portfolios — Schneider Electric Software, AVEVA and OSIsoft — into one industrial software business, and sits on the Schneider Electric Executive Committee.

An unusual profile for an industrial software CEO: his degrees are in Arabic and Middle Eastern studies and international politics, not engineering, and he built his career on the commercial and geographic side rather than the product side. He began at Accenture in London working on digital transformation for the global energy sector, then spent over a decade at Cisco leading sales and services and developing smart-cities strategies across China, Asia, Japan, Australia, the USA and Europe.

Career: Chief Executive Officer, AVEVA; Chief Operating Officer, AVEVA; Chief Revenue Officer, AVEVA; President, Middle East & Africa, Schneider Electric

Education: MSc, International Politics, School of Oriental and African Studies, University of London; BA, Arabic & Modern Middle Eastern Studies, St Anne's College, University of Oxford

The company: No longer an independent company to evaluate on its own financials — AVEVA is now the industrial-software arm of Schneider Electric, and is about to absorb Cognite too, becoming the most consolidated platform on this list.

What they sell: CONNECT (industrial intelligence platform), PI System (real-time operational data), E3D Design (3D plant design), Unified Engineering, and the AVEVA Industrial AI Assistant — now absorbing Cognite's Data Fusion and Atlas AI as well.

02 Where The Company Sits

Strong digital-twin overlap with Sand, but operating as part of a much larger industrial conglomerate with hardware, energy management and automation businesses behind it.

03 Talking Points

- Smart cities and public-sector infrastructure are his genuine specialism, not a talking point — he wrote a book on it.
- Commercially grounded rather than technical: he came up through revenue and country management, so expect a business-case conversation.
- He sits on Schneider Electric's Executive Committee, so an AVEVA conversation can reach the parent without a separate introduction.

What to pressure-test about the company:

- No longer independently evaluable — standalone financials haven't been disclosed since the 2023 acquisition
- Employee reviews explicitly flag uncertainty about further internal consolidation under Schneider
- Integrating Cognite adds real near-term execution risk on top of the existing Schneider integration

04 GIP Context

GIP: No named GIP portfolio company was confirmed as an AVEVA customer. AVEVA does sell a purpose-built "Unified Operations Center for Data Centers" product directly relevant to GIP's CyrusOne data-center holdings, but no confirmed CyrusOne–AVEVA relationship was found.

BlackRock: The clearest indirect link in this set: AVEVA's parent, Schneider Electric, has BlackRock as its largest shareholder at 7.93% of shares outstanding (per recent filings).

Others at AVEVA: Peter Herweck (Chairperson (former CEO, Schneider Electric))
