01 Who You're Meeting

Stephen Ehikian — President, C3.ai.

In role: President since 8 May 2026, reporting to Siebel; was CEO from September 2025 until that date

Today: Runs day-to-day execution under Siebel, having led the restructuring that lowered C3 AI's cost base during his period as CEO.

A founder and a public-sector operator, which is an unusual combination. He built and scaled two companies that Salesforce acquired: RelateIQ, which underpins Salesforce Einstein, and Airkite.ai, now a core component of Agentforce. He was Vice President of AI Products at Salesforce, then served in the second Trump administration as Acting Administrator and Deputy Administrator of the US General Services Administration between January and September 2025, working on federal procurement reform, technology modernisation and AI adoption.

Career: President, C3 AI; Chief Executive Officer, C3 AI; Acting Administrator and Deputy Administrator, US General Services Administration; Vice President, AI Products, Salesforce

Education: BS, Mechanical Engineering and Economics, Yale University; MBA, Stanford Graduate School of Business

The company: Public but smaller and less differentiated than Palantir, with real recent strain: revenue growth has decelerated sharply, founder Tom Siebel resumed the CEO role in May 2026 after a health-related leadership change, and Glassdoor sentiment has fallen from 3.1 to 2.9 over the past year.

What they sell: C3 Agentic AI Platform (end-to-end build/deploy/operate environment) plus 40+ prebuilt, industry-specific Enterprise AI applications and C3 Generative AI tools.

02 Where The Company Sits

Closest comparable to Sand on “vertical AI applications” positioning, but sells software licenses/subscriptions rather than the services-heavy delivery model Sand uses — and is currently the most stressed name on this list financially and organizationally.

03 Talking Points

- The operational counterpart — he runs execution while Siebel sets direction. For anything practical, he is the conversation.
- His GSA experience means federal procurement and public-sector AI adoption are first-hand knowledge, relevant for regulated PortCos.
- He went from CEO to President in eight months. Understand how the two roles now divide before assuming who can commit.

What to pressure-test about the company:

- Customer concentration risk: Baker Hughes has historically been ~20–30% of revenue via a JV with renegotiated minimums
- Quarterly revenue has decelerated markedly (Q3 FY2025 from \$98.8M in Q3 FY2025 to \$51.6M in Q4 FY2026, per filings)
- Founder Tom Siebel stepped back for health reasons in Sept 2025, then resumed the CEO role in May 2026 — real leadership turbulence

04 GIP Context

GIP: No connection found. None of C3.ai's named customers (Shell, Baker Hughes, Bank of America, U.S. Air Force/Army, Cargill, Koch) are GIP portfolio companies.

BlackRock: Confirmed passive ownership — 6.8% of shares outstanding per BlackRock's April 2026 Schedule 13G/A filing, its largest disclosed institutional holder after Vanguard (6.1%) and founder Thomas Siebel's combined family/trust stakes (~15%+).

Others at C3.ai: Thomas M. Siebel (Founder, Chairman & Chief Executive Officer); Edward Abbo (Chief Technology Officer)
