01 Who You're Meeting

Jatin Dalal — Chief Financial Officer, Cognizant.**In role:** CFO since December 2023**Today:** Owns Cognizant's finances through the turnaround — margin expansion to 16.1%, \$2B returned to shareholders in 2025, and the integration economics of the Belcan and Thirdera acquisitions.

One of the most experienced CFOs in IT services, and he came directly from a competitor. He was CFO of Wipro from April 2015 to November 2023, adding President responsibilities from December 2019, having earlier been CFO of Wipro's IT Business from 2011 to 2015. He joined Wipro in 2002 from General Electric, where he began his career in 1999. He is a Chartered Accountant (India), a Chartered Management Accountant (UK) and a Chartered Financial Analyst.

Career: Chief Financial Officer, Cognizant; Chief Financial Officer & President, Wipro Limited; Chief Financial Officer, Wipro Limited; Chief Financial Officer, IT Business, Wipro**Education:** Chartered Accountant (India); Chartered Management Accountant (UK); Chartered Financial Analyst; Postgraduate Diploma in Business Administration (finance and international business), Narsee Monjee...**The company:** Returned to what it calls the industry's winner's circle two years ahead of the target set at its Investor Day, on 7% revenue growth and 140 basis points of margin expansion. 28 large deals were signed in 2025 with total contract value up nearly 50% year over year.**What they sell:** Application services, digital engineering, cloud and infrastructure, and business process services. The Belcan acquisition added engineering, research and development capability aimed at a \$190B market; Thirdera made it one of ServiceNow's largest partners with Global Elite status.

02 Where The Company Sits

Cognizant's turnaround is real but it competes on the same ground as TCS, Infosys and Wipro, and its scale sits below Accenture and Capgemini. The two things that differentiate it for an infrastructure portfolio are Belcan, which brings genuine engineering R&D rather than IT services, and its ServiceNow position — Global Elite partner status matters if a PortCo's workflow layer is ServiceNow. Book-to-bill of roughly 1.3x on \$28.4B of trailing bookings is the healthiest forward signal in its peer group.

03 Talking Points

- Three professional finance qualifications and two decades of services-industry P&L — commercial structure conversations will be rigorous.
- He ran Wipro's finances for eight years, so he knows precisely how the competitor across the table prices.
- Margin guidance for 2026 implies only 10–30 basis points of further expansion; discount room is genuinely constrained and he will say so.

What to pressure-test about the company:

- 2026 guidance of 4.0–6.5% constant currency implies deceleration from 2025's 6.4%
- Scale sits well below Accenture and Capgemini in a market where scale drives ecosystem access
- Highly exposed to the same offshore labour-arbitrage model that AI delivery is compressing

04 GIP Context

GIP: No publicly disclosed GIP relationship. Most plausible route in is a PortCo's existing application or infrastructure managed-services contract; Belcan is the part worth testing for asset-level engineering work.**BlackRock:** No publicly disclosed operating relationship; standard index holdings of CTSH only.**Others at Cognizant:** Ravi Kumar S (Chief Executive Officer)www.cognizant.com · [Cognizant SEC annual report \(FY2025\)](#) · [FY2025 results](#) · [Company LinkedIn](#)
