01 Who You're Meeting

Ravi Kumar S — Chief Executive Officer, Cognizant.

In role: CEO since January 2023

Today: Sets Cognizant's strategic direction and owns the AI builder strategy that returned the firm to growth — 7% in 2025 with 140 basis points of margin expansion. He began his career as a nuclear scientist at India's Bhabha Atomic Research Centre, which is not a background any other executive in this contact list shares. He moved into consulting through PricewaterhouseCoopers, then Cambridge Technology Partners — where he built a next-generation CRM practice — Oracle and Sapient. He joined Infosys in 2002 and spent twenty years there, building its global Oracle and CRM practices, leading Global Delivery in manufacturing, heading the Insurance, Healthcare and Cards &

Career: Chief Executive Officer, Cognizant; President; Chairman of the Board, Infosys BPM Ltd, Infosys; Group Head (Insurance, Healthcare, Cards & Payments); Global Delivery leadership, Infosys; Director, Sapient (now Publicis Sapient)

Education: MBA, Xavier Institute of Management, India; Bachelor's in Engineering, Shivaji University

The company: Returned to what it calls the industry's winner's circle two years ahead of the target set at its Investor Day, on 7% revenue growth and 140 basis points of margin expansion. 28 large deals were signed in 2025 with total contract value up nearly 50% year over year.

What they sell: Application services, digital engineering, cloud and infrastructure, and business process services. The Belcan acquisition added engineering, research and development capability aimed at a \$190B market; Thirdera made it one of ServiceNow's largest partners with Global Elite status.

02 Where The Company Sits

Cognizant's turnaround is real but it competes on the same ground as TCS, Infosys and Wipro, and its scale sits below Accenture and Capgemini. The two things that differentiate it for an infrastructure portfolio are Belcan, which brings genuine engineering R&D rather than IT services, and its ServiceNow position — Global Elite partner status matters if a PortCo's workflow layer is ServiceNow. Book-to-bill of roughly 1.3x on \$28.4B of trailing bookings is the healthiest forward signal in its peer group.

03 Talking Points

- Twenty years at Infosys before Cognizant — he knows exactly how his largest competitors price and deliver.
- His localisation work is the most relevant thing on his record: building talent hubs with local governments and universities is close to what a portfolio-wide capability programme needs.
- A nuclear scientist turned services CEO — technical depth is real, and a substantive engineering conversation will not be wasted on him.

What to pressure-test about the company:

- 2026 guidance of 4.0–6.5% constant currency implies deceleration from 2025's 6.4%
- Scale sits well below Accenture and Capgemini in a market where scale drives ecosystem access
- Highly exposed to the same offshore labour-arbitrage model that AI delivery is compressing

04 GIP Context

GIP: No publicly disclosed GIP relationship. Most plausible route in is a PortCo's existing application or infrastructure managed-services contract; Belcan is the part worth testing for asset-level engineering work.

BlackRock: No publicly disclosed operating relationship; standard index holdings of CTSH only.

Others at Cognizant: Jatin Dalal (Chief Financial Officer)
