01 Who You're Meeting

Joe Ucuzoglu — Global Chief Executive Officer, Deloitte.

In role: Appointed December 2022, taking the role in January 2023

Today: Leads the largest professional services organisation in the world — over 470,000 professionals and more than \$70B of revenue — across audit and assurance, tax and legal, consulting, risk advisory and financial advisory.

A career Deloitte partner who came up through audit rather than consulting, which shapes how he thinks about risk and governance. He joined the firm in 1997 and led the US Audit & Assurance practice, served as US National Managing Partner for Government, Regulatory and Professional Matters, and was CEO of Deloitte US from 2019 to 2022 before taking the global role. He speaks regularly at US business schools including Duke Fuqua, Yale SOM, Virginia Darden, USC Marshall and Notre Dame Mendoza.

Career: Global Chief Executive Officer, Deloitte; Chief Executive Officer, Deloitte US; Chief Executive Officer, Audit & Assurance, Deloitte US; National Managing Partner, Government, Regulatory and Professional Matters, Deloitte US

Education: BS Accounting, University of Southern California

The company: The largest firm in this set by revenue and headcount, and the first professional services firm ever to pass \$70B. It has committed \$3B through FY2030 to generative and agentic AI, and is unusual among the Big Four in building a product business (Zora AI) rather than only a services practice.

What they sell: Audit and assurance, consulting, tax, legal, risk and financial advisory, and managed services, delivered by member firms. The AI product line is Zora AI, built with NVIDIA to create agentic digital co-workers, supported by a Global Agentic Network, Silicon2Service, and the Trustworthy AI governance framework.

02 Where The Company Sits

Deloitte's distinguishing move is the same one BCG made, at a different scale: building rather than only advising. Zora AI is a product business, and the IOC relationship is the most directly relevant proof point for infrastructure — from Milano Cortina 2026 onwards Deloitte is Games Technology Integration Partner, responsible for an integrated technology infrastructure and games platform across the Olympic and Paralympic Games.

03 Talking Points

- Audit background, not consulting — governance, controls and independence are native ground, and he will raise them before you do.
- Deloitte's green hydrogen work under him is a genuine energy-transition credential, not a marketing position.
- If a Deloitte member firm audits a PortCo, independence rules constrain what consulting can follow. He knows those rules better than anyone in this list;

What to pressure-test about the company:

- Growth of 4.8% trails Accenture's 7% and Cognizant's 7% — scale is not translating into pace
- Deloitte UK posted its first revenue decline in fifteen years, and the US federal practice cut jobs
- The member-firm structure means the global figure describes a network, not a contracting entity; quality and capability vary by geography

04 GIP Context

GIP: No publicly disclosed GIP relationship. As the largest audit and advisory network, an existing relationship at PortCo or fund level — audit, tax or transaction services — is likely and would carry independence constraints on what consulting work can then be done. Check that before scoping anything.

BlackRock: No publicly disclosed operating relationship.
