01 Who You're Meeting

Safra Catz — Executive Vice Chair of the Board, Oracle.

In role: Executive Vice Chair since September 2025; CEO from 2014 to 2025

Today: Board-level stewardship alongside Ellison, continuing a partnership he describes as spanning 26 years.

She joined Oracle in 1999 after thirteen years in investment banking at Donaldson, Lufkin & Jenrette, became its finance chief in 2005, and was named co-CEO in 2014 alongside Mark Hurd when Ellison stepped back — continuing as sole CEO after Hurd's death in 2019. Across eleven years at the helm she turned Oracle from a database provider into a hyperscale cloud business, competing directly with Microsoft and Alphabet for data-centre share, and was central to its acquisition programme. She is trained in both finance and law.

Career: Executive Vice Chair of the Board, Oracle; Chief Executive Officer, Oracle; Co-Chief Executive Officer (with Mark Hurd), Oracle; Chief Financial Officer, Oracle

The company: Remaining performance obligations reached \$638B at FY2026 close, up more than 6.5 times from \$98B two years earlier — signed, non-cancellable contracts giving Oracle more than a decade of visibility in its infrastructure business, against \$67.4B of actual annual revenue.

What they sell: Oracle Database, Fusion Cloud ERP and HCM applications, NetSuite, industry software including Cerner health records, and Oracle Cloud Infrastructure — now the growth engine and the reason for the capital programme.

02 Where The Company Sits

The RPO figure is the single most striking number anywhere in this app, and it cuts both ways. Oracle has effectively pre-sold roughly ten years of OCI capacity to the most capital-rich AI companies in the world, which makes the revenue ramp close to contracted if it can build and energise the capacity on schedule.

03 Talking Points

- Ex-banker and ex-CFO now on the board — the right escalation if the commercial structure needs board-level comfort.
- She built the cloud business commercially; the co-CEOs inherited it. Institutional memory on how the big contracts were actually struck sits with her.
- No longer executive. Route operating decisions through Magouyrk and Sicilia.

What to pressure-test about the company:

- Negative free cash flow of \$23.7B in FY2026, with ~\$70B of net capex and ~\$40B of new debt and equity planned for FY2027
- Revenue recognition depends entirely on building and energising capacity on schedule — an execution risk, not a demand risk
- Extreme customer concentration: the backlog is dominated by a handful of AI labs whose own funding is not assured

04 GIP Context

GIP: No publicly disclosed GIP relationship. Oracle's ERP and database footprint makes it likely present at PortCo level for corporate systems. Separately, its data centre build-out makes it a significant demand driver in digital infrastructure — relevant to asset-side analysis, not just vendor management.

BlackRock: No publicly disclosed operating relationship; standard index holdings of ORCL only.

Others at Oracle: Clay Magouyrk (Co-Chief Executive Officer); Mike Sicilia (Co-Chief Executive Officer); Larry Ellison (Chairman & Chief Technology Officer)
